## Is Your Current Computer Guy Causing You To Need One of These?

- Does he take *forever* to call you back and respond to your requests?
- Are you paying him good money to keep things working but are STILL having *constant* problems, slowness and other recurring issues?
- Are you worried he's not backing up and securing your network like he promises?
- Does your *head* hurt from dealing with all the hassles?

Are you sick and tired of constant IT, phone and computer problems interrupting your day, frustrating you and your team? Do you feel stuck with an absent-minded computer guy who isn't delivering the SERVICE you want, but you don't know who else you can trust to do a good job without overcharging you?

**If so, I have the solution that will make IT-related issues one headache you NEVER have to deal with again.**

My name is Shelton Leleux and I'm the Vice President of Business Development for Evolve Technology Group and I am here to help make your life easier when it comes to technology hassles. We specialize in delivering proactive IT support and services to *businesses* like yours with friendly, knowledgeable techs who will put you at ease to resolve your IT problems quickly and efficiently. Chances are you've never heard of me or my company before, but when you finish reading this letter, you'll be glad you finally have.

**Why can I make a BOLD statement?**

Because almost every small business CEO I talk to will confess that their current support person – whether it's a friend who's good with computers or a "professional" IT company – is NOT completely delivering the level of service they want. Therefore, they are forced to deal with ongoing technical issues and worry that their network is NOT secure from hackers, ransomware, extended downtime, HIPAA compliance, and a range of data-erasing disasters. **CLEARLY – THIS IS UNACCEPTABLE!**

***ISN'T IT TIME TO FINALLY GET RID OF THIS HEADACHE?***

Although the notion of providing reliable, affordable, full-service computer support isn't an amazing concept, it still surprises me how many computer technicians don't get it right. Therefore, I understand if you are skeptical about our claims. My guess is that you've been disappointed, even burned, by other IT guys in the past. That's why I'd like to extend the following offer to you...

## A \$495 "Get-To-Know-Us" FREE Gift...

As a prospective client, I'd like to offer you a free, no-obligation, no-sales-pressure IT systems assessment where I'll send one of my senior technicians to your office to conduct an audit of your network's security and overall health.

When done, we'll give you a report of findings that will not only reveal if your data and computer network really are properly backed up and secure, but also if there is anything you need to do now to prevent a major network outage, data loss, hacker attack, or other expensive, data-erasing disaster. Plus, we can almost always show you how to save a little (or a LOT) on hardware and software by switching to our efficient cloud-computing solutions.

After all, it **never hurts** to get a competitive bid from a qualified 3<sup>rd</sup> party – and this assessment is totally, completely free without obligation.

### What's next?

To schedule your FREE IT Systems Assessment, please call me directly at 806-470-4905. You may also email me at the email I've provided below.

The assessment only takes 60-90 minutes to conduct, but when it's done, you'll know for sure if your company's data is secured and, in the event of a disaster, exactly how fast you could be back up and running again (if at all). My associate Marco Tamez or I will be following up in the next couple of days to make sure you received this letter, and to see if you would like to schedule this free IT systems assessment. If not, please just let us know.

Awaiting your response,

Shelton Leleux  
Vice President, Business Development  
Evolve Technology Group, LLC.  
CALL ME TODAY! 806-470-4905 (cell) or my office at 806-451-1405

**P.S. Why risk it?** Our free IT systems assessment comes with ZERO STRINGS ATTACHED, no expectations and no obligations on your part. If nothing else, it will be a good third-party validation of how well your systems are currently performing.

**LET US MAKE A BOLD STATEMENT  
SECURITY, RELIABILITY, AFFORDABILITY**

# How Does Your Current IT Guy Stack Up?

**Take this quiz to find out!**

How can you tell if you are receiving poor or substandard service? How do you know if your IT company or computer guy is doing everything possible to secure your network and prevent expensive disasters? **If your technician does NOT score a “yes” on every point, you could be paying for substandard support and jeopardizing your data and network’s security!**

- ☐ Do they answer their phone LIVE and respond to emergencies promptly (within 60 minutes)?
- ☐ Are they easy to reach and highly responsive (responding same day) when you need them for non-emergencies?
- ☐ Do they proactively monitor, patch and update your computer network’s critical security settings daily? Weekly? At all? How do you know for sure?
- ☐ Do they offer proof that they are backing up ALL your data, laptops and devices?
- ☐ Do they meet with you regularly (at least once a quarter) to report what they’ve been doing, review projects and offer new ways to improve your network’s performance instead of waiting until you have a problem to make recommendations?
- ☐ Do they provide detailed invoices that clearly explain what you are paying for?
- ☐ Do they explain what they are doing and answer your questions in terms that you can understand, NOT in “geek speak”?
- ☐ Have they proactively discussed cybersecurity with you, and made recommendations for better protecting your network from ransomware?
- ☐ Have they provided you complete network documentation, or do they hold the “keys to the kingdom” refusing to give you admin passwords?
- ☐ Do they offer any guarantees on their services?
- ☐ Do they arrive on time and dress professionally?
- ☐ Do you look forward to seeing them, working with them, or do you cringe every time you have to make that call?
